Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10-25, 27-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Beckwith '653. Beckwith discloses a coiling device containing all of the claimed elements including a mandrel comprising a flange 56, a first arm 58, a second/containing arms 64 such that the second arm pivots between a first and second positions about pin 66 and in turn causes arm 58 to be mobile between a first and second position (figure 2). Inclined walls as required by claim 1 is read onto overlapping angled/curved portions of members 64 and 58 (figure 3) which are in contact with each other through pin 63 whereby member 58 can only be repositioned if member 64 is adjusted to a second position as shown in figure 2 due to the contact portion about pin 63. Member 56 is movable axially thru shaft 16 and associated gearing as required by claim 7. A deposition ring as required by claim 8 is read onto portion of member 42 and 58 which ring pins 60. A cylindrical central body as required by claim 10 is read onto member 34. Limitations of claims 11 and 12 are read onto members 62, 74 and 68. Limitations of claim 13 are read onto member 42b. For purposes of claim 14, control means are read onto elements 74, 62 and associated gearing. For purposes of claims

15 and 16, a second actuation means is read onto members 40 and 44. Rod means of claims 17-20 are read onto member 70 whose rotary functions are noted at col. 3, lines 8-9.

Allowable Subject Matter

Claim 9 is allowed.

Response to Arguments

Applicant's arguments filed 11/21/2007 have been fully considered but they are not persuasive. Applicants argue that the amended claims now define over the prior art of record. In response the examiner points out that the Beckwith reference still reads on the claims as stated above. Claim 9 has been indicated to be allowable.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
